Summative End of Module Assignment - 2026-7-3

Start Assignment

- Due 3 Aug by 22:00
- Points 28
- Submitting a file upload
- Attempts 0
- Allowed attempts 4
- Available 3 Jul at 9:00 - 3 Aug at 22:00

End-of-module Assessment

Please complete this assignment that contributes 70% towards your final mark for this module. This assessment requires you to download the assignment document, complete the questions inside, and then upload your answers. You will then receive a grade and feedback for this assignment once it has been marked.

You will only be able to take this assessment once and it must be completed and submitted by the date and time shown below. Remember that in the orientation module we discussed Academic Honesty (https://cityuniversity.instructure.com/courses/260/pages/unit-3-plagiarism-and-use-of-ai?module_item_id=3579) (which includes information about generative AI); we encourage you to revisit this section of the orientation module before undertaking your assignment. If you would like to change your submission before the deadline has passed, you will be able to resubmit your materials up to three more times.

We strongly recommend that you have engaged with all components of the blocks before attempting this end-of-module assignment. We also suggest that you complete the **end-of-module reflection** (https://cityuniversity.instructure.com/courses/253/assignments/761) before progressing to this final assessment. Please use the **end-of-module Q&A** (https://cityuniversity.instructure.com/courses/253/discussion_topics/650) to post any general questions such as if you are unclear how to submit this last assignment.

Following this assessment, you will be given your marks and feedback in line with **Regulation 19 of the Assessment Regulations and Policy** (https://www.citystgeorges.ac.uk/about/governance/policies/student-policies-and-regulations#accordion573807-header573821) . The End-of-Module grade and feedback will be available within 4 weeks of your submission deadline. **Per the university policy, all summative assessment grades are provisional until they are reviewed by the assessment board which meets every few months.**

You must submit this assignment: Please also make sure you have completed your mid-module assignment by this point as well, if you have not already undertaken this assessment. Once you have submitted the final assignment, you will have the opportunity to provide anonymous feedback on the

module via the module evaluation quiz, available under the "units" tab, at the bottom of the block 8 list. **Reminder: Both your mid-module assessment and your final-module assessment must be submitted by the deadline for the final-module assignment.**

Assignment Details:

Please download **this document (https://cityuniversity.instructure.com/courses/253/files/72561?wrap=1)** **(https://cityuniversity.instructure.com/courses/253/files/72561/download?download_frd=1)** that contains the questions and dataset for your assignment. You must submit your answers using **this template document. (https://cityuniversity.instructure.com/courses/253/files/14379?wrap=1)** **(https://cityuniversity.instructure.com/courses/253/files/14379/download?download_frd=1)** Please do not include your name in the file name or within the documents you upload, to ensure marking can remain anonymous.

You can find the rubric that this assessment will be marked via further down on this page in the form of a table. This assignment links to module outcomes MO3, MO4, MO5, MO6, and MO7.

Grade and Feedback:

Grades and feedback will be provided within 4 weeks of the submission deadline.

Updated Big Data and Visualisation

Criteria	Ratings					Pts
Research Questions	**4 Pts Excellent** All 3 questions are justified clearly with the use of external resources including from the background reading.	**3 Pts Good** Good description of the 3 chosen research questions. However, details or justifications provided could be fuller.	**2 Pts Satisfactory** A description of research questions is present. There might not be the 3 required but there is a resonable attempt made to justify.	**1 Pts Below Average** There are not 3 research questions given. Description of the research questions given is not clearly defined or coherent and justification is missing or limited.	**0 Pts Unsatisfactory** No attempt to state questions or justify.	4 pts
Data Evaluation	**4 Pts Excellent** Evaluation of the data is presented, clearly describing what was done, why it was done, and how it was done. Strong justification is given with reference to relevant sources.	**3 Pts Good** The evaluation of data is good, showing what is done and how it is done. There is some justification provided for why it was done, but lacks in-depth evidence of research.	**2 Pts Satisfactory** The evaluation of data is satisfactory, showing some description of what is done and how it is done. However, lacks in justifying why behind what is done.	**1 Pts Below Average** The evaluation of data only shows what is done or how it is done. There is no description provided to justify the approach taken.	**0 Pts Unsatisfactory** No attempt made to evaluate the data.	4 pts
Data Cleaning	**4 Pts Excellent** Clear details are provided for the methods and approaches taken for cleaning and handling data	**3 Pts Good** Good explanation given of the approaches taken to clean and handle data, with some	**2 Pts Satisfactory** The process of cleaning and handling data is reasonable in places but lacks justification	**1 Pts Below Average** Very minimal cleaning is done or the cleaning or fixing approaches taken are not	**0 Pts Unsatisfactory** No attempt made to clean the data.	4 pts

Criteria	Ratings					Pts
	including explanation for why these were chosen.	justification of why these techniques were chosen.	for methods or approaches chosen to clean the data.	suitable for the task.		
Analysis Techniques and Evaluation Criteria	**4 Pts** **Excellent** Clear details are provided for the chosen analysis techniques. Very well justified with references to relevant resources. Evaluation criteria are also provided and justified with references to relevant sources.	**3 Pts** **Good** The explanation provides good details of the chosen analysis techniques. Also, the explanation for the chosen evaluation criteria has a good level of detail and justification.	**2 Pts** **Satisfactory** There is some account of the explanation provided for the chosen analysis techniques and evaluation criteria.	**1 Pts** **Below Average** The explanation shows an inappropriate choice of the analysis technique and/or evaluation criteria. There is a minimal description provided for the analysis techniques and/or evaluation criteria.	**0 Pts** **Unsatisfactory** No attempt made to choose and justify analysis techniques and/or evaluation criteria.	4 pts
Summarising Results	**4 Pts** **Excellent** Work convincingly summarises the implications of the analysis steps for the chosen 3 research questions. All results are mapped to the 3 research questions with clean discussion	**3 Pts** **Good** There is a good summary of the implications of the analysis steps for the chosen research questions. The results are explicitly mapped to the research questions. There is an attempt to	**2 Pts** **Satisfactory** The results are presented for the chosen research questions but not mapped to the research questions or there is limited clear explanation of them. There is a limited attempt at expansion	**1 Pts** **Below Average** The results provided do not make sense or are minimally described.	**0 Pts** **Unsatisfactory** No attempt is made to summarise the results of the analysis.	4 pts

Criteria	Ratings					Pts
	and justification. There is a discussion of further suggestions on outcomes.	discuss the outcome.	and conclusion.			
Handling Large Dataset	**4 Pts Excellent** Discussion is provided in terms of how data would be handled if it were to spread over multiple computers. Justification of technology with reference is provided. There is a discussion on parallelism, servers, shared load, processors, high-velocity requirements, etc.	**3 Pts Good** Good discussion in terms of how data would be handled if they were to be spread over multiple computers. Good justification of technology and mention of distribution load. There is no direct evidence of addressing high velocity (“rapid response to new data”).	**2 Pts Satisfactory** There is no mention of specific technology and distribution load. However, Hadoop or similar tools were mentioned and described.	**1 Pts Below Average** There is minimal discussion provided which would likely be a net gain versus a conventional DBMS and single-process multiload approach.	**0 Pts Unsatisfactory** No attempt is made at a discussion on handling data on multiple computers.	4 pts
Privacy Issues	**4 Pts Excellent** Discussion is provided for 3 issues related to specific laws, with a discussion on how to resolve them.	**3 Pts Good** One or two of the relevant laws is identified and discussed, and there is some mention of GDPR	**2 Pts Satisfactory** Shows basic discussion on personal data or the length of the data held. There is no mention of GDPR.	**1 Pts Below Average** There is not enough or very limited attempt to address or resolve any important privacy issues.	**0 Pts Unsatisfactory** No attempt is made to provide a discussion on privacy issues.	4 pts
